MSC Self-Study Report Standard 7 Highlights

STANDARD VII: Governance, Leadership and Administration

The institution is governed and administered in a manner that allows it to realize its stated mission and goals in a way that effectively benefits the institution, its students, and the other constituencies it serves. Even when supported by or affiliated with governmental, corporate, religious, educational system, or other unaccredited organizations, the institution has education as its primary purpose, and it operates as an academic institution with appropriate autonomy.

1. The MSC is a well-structured institution that is governed by clearly defined sets of bylaws, rules, regulations, procedures, certifications, policies, and procedures.
2. The academic, research, and service accomplishments clearly demonstrate that the organizational leadership of the MSC and the governance of same allow the attainment of its mission and goals for the success of academic and programmatic areas.
3. The institutional structures, leadership, management, and governance have proven to be effective and resilient, allowing for and encouraging institutional development in times of crisis, financial constraints, and administrative-political changes.
4. Numerous participatory mechanisms in the institutional governance provide opportunities for the faculty and students to elect representatives at the different decision-making levels of the MSC and the UPR system.

Recommendations and/or Areas of Improvement

1. The mechanisms for finding all the institutional policies and regulations should be simplified.
2. Systematize the evaluation of all academic administrators.
