RESEARCH PHARMACY

UPR-MEDICAL SCIENCES CAMPUS

Specialized pharmaceutical support for clinical research and service programs.

Safe handling, regulatory compliance, and support for investigators.

WHO WE ARE?

The Research Pharmacy of the Medical Sciences Campus provides specialized pharmaceutical services for clinical studies, supporting investigators in the safe management of investigational products and assuring the compliance with established regulatory requirements.

Our focus is centered on study integrity, participant safety, and continuous support for the research team.

Pharmacy staff:

- Wanda Ramón-Milián, RPh – Pharmacy Manager & Pharmacist on Record
- Sayel Rivera, PharmD – Assistant Professor and Associate Pharmacist
- Esmeralda Barreto, PhT – Pharmacy Technician

OUR SERVICES

Investigational Product (IP) Storage
Each study has a dedicated storage cabinet. Investigational products are kept under lock and stored according to the protocol and/or manufacturer requirements, with continuous temperature monitoring through a 24/7 alert system.

Dispensing and Preparation
Preparation of investigational products for oral, intramuscular/subcutaneous (IM/SC), and intravenous (IV) administration within the facility. Upon prior planning, preparations may be transported to MSC clinics with a temperature monitoring device and documentation to record the transport.

Clinical Guidance and Support
Staff are available to collaborate with the clinical team, providing specialized pharmaceutical guidance that complements the care provided to study participants.

OUR FACILITY INCLUDES

- Controlled access with a dual-security system
- Alarm system and 24/7 security cameras
- Dedicated electrical generator
- Refrigerators, freezers, and ultra-low freezers
- 24/7 monitoring equipment with alarm systems
- Central air conditioning and backup units
- Humidity control
- Autoclave
- Fax and printer
- Participant counseling room
- Dedicated storage space for each study
