¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.

¹ As the result of errors in enumeration, the data for "Operatives (n. e. c.)" in the several apparel manufacturing industries include about 20,000 employed females who should have been included in the category "Dressmakers and seamstresses, except factory." This latter category is also understated by approximately 25,000 employed females who were omitted from the labor force. These figures refer to Puerto Rico as a whole. See text for additional information.
